To our expectant mothers,

If this is your first visit for a new pregnancy, please contact your insurance company to find out if genetic testing is covered. At your visit, we will discuss the tests in detail. We do recommend these tests as the most accurate way to determine genetics.

Non Invasive Prenatal Testing (NIPT)

Screens for chromosomal abnormalities like Down Syndrome, Trisomy 18 and 13.

ICD 10 code for women 35 years and older Q09.511

ICD 10 code for women under 35 Z34.911

Hereditary Screening

For disorders that may run in the family like Cystic Fibrosis, Fragile X, Tay-Sachs, or Spinal Muscular Atrophy.

ICD 10 code Z34.00

We find that calculating your out of pocket costs prior to your visit will help you decide whether these optional tests are a good fit for your prenatal care.

Please visit the link below for additional information regarding estimated costs on NIPT and Hereditary Testing.
